

Starting the Commercial Building Code on an regular update cycle

by J.B. Smith S&B Commercial Buildings Program Manager, jsmith@commerce.state.wi.us, 608-266-0251

The Safety and Buildings Division is in the early stages of putting Comm 61-65, Commercial Building Code, into a cycle of regular adoption of the most recent International Code Council's model codes editions.

The current Comm 61-65 adopts portions of the 2000 editions of the I-codes (International Building Code, Energy Conservation Code, Fuel Gas Code, Mechanical Code). The 2000 editions were timely during the lengthy process of moving Wisconsin into substantial adoption of the I-codes, which became effective in July 2002.

In moving now to solidify regular updating of Comm 61-65, a process which can take several years, Safety and Buildings Division staff are **working with advisory code councils towards adoption of the 2006 editions of the I-Codes**. Public hearings can take place as soon as the 2006 editions are in print, in early 2006. We are looking for a delayed effective date in 2007.

To best be prepared for 2006 I-codes editions, we will review the 2003 editions, as well as changes that have already been approved for the 2006 editions.

"What I see as one of the basic goals of the S&B advisory code councils is to avoid creating unnecessary

Wisconsin special exceptions ("Wisconsinism's") and to eliminate as many of the current Wisconsinism's as possible." - J.B. Smith

In addition to activity of the S&B Commercial Building Code Council (which met in November on general topics) and the Multifamily Dwelling Code Council, several "specialty" advisory

councils have begun to meet.

One of those specialty councils is the Means of Egress Advisory Council, which first met in September 2004, focusing on IBC Chapters 10 (Means of Egress) and 11 (Accessibility).

In going over the 2003 edition in comparison to the 2000, and going over the preliminary 2006 changes, council members did not identify any sections that appeared problematic. Members and

Wisconsin Construction Codes Report

Division, January, 2005

www.wisconsin.gov/
state/app/wizard

www.wisconsin.gov

S&B staff determined that many of the current Wisconsinism's can be eliminated due to changes that have taken place at the national level.

As one of the council members was overheard stating, "These changes and the updated ICC/ANSI standard bring the code closer than ever to the intent of Americans with Disabilities Act and of Fair Housing laws."

The changes were so straightforward to council members that additional meetings were not needed now.

Not all code council reviews will be as

Plumbing Inspector's Institute Questions and Answers

by Lynita Docken, S&B Plumbing Program Manager, Ldocken@commerce.state.wi.us, 608-785-9349

The Plumbing Inspector's Institute brought up several questions that required the answer of "Watch the *Codes Report* and we'll get back to you." S&B plumbing program staff scratched our heads, and these are our answers.

1. Is a sanitary tee on its back allowed for a water closet connection in a wet vent or circuit vent installation? Doesn't Comm 82.31(9)(b) prohibit this practice?

The drawing is code compliant. Comm 82.31(9)(b) does not apply to this installation because the rule states "A vent shall not connect to a fixture drain within the distance equal to 2 diameters of the drain piping from the weir of a trap." The fixture drain begins at the fixture and ends at the junction with another drain pipe. See Comm 81.01(96) for fixture drain definition. Since the weir of the trap is internal, 82.31(9)(b) would not apply to this situation.

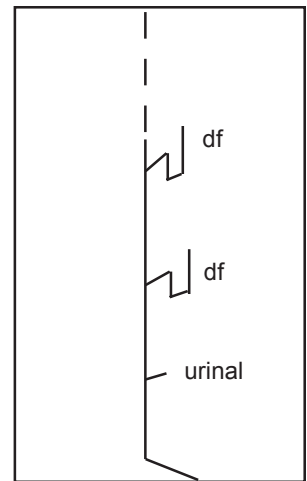

Online continuing ed will be presented in March

You can sign up to receive information about interactive evening plumbing continuing education classes in March that you can attend via your computer at home. Sign up for an email group to receive messages when further details are arranged. <http://www.commerce.state.wi.us/SB/SB-DivContinuingEducation.html>.

2. On a combination drain and vent stack, may one of the fixtures be a urinal? Comm. 82.31(17)(a) has conditions for the installation of combination drain and vent stacks. One of the conditions reads that “The drain stack shall not serve more than 3 fixtures.” This requirement controls the number of fixtures on the stack. No more than the three fixtures may connect to the stack. Another condition allows that “A urinal may not discharge into the combination drain and vent portion of the stack.” The code requirement doesn’t state that urinals may not connect to the stack, but that the urinal may not discharge into the drain and vent portion of the stack. There can be a part of the stack that is not part of the drain and vent portion. The only place a urinal may discharge into the combination drain and vent stack is at the lowest position, because at the point of discharge no additional fixtures are being vented by the stack.

3. May a vent from a catch basin inside a parking structure terminate within the structure?

Comm 82.31(16)(d) lists locations of vent terminals. The first item on the list states that “A vent shall not terminate under the overhang of a building.” Even though the vent is installed within an open parking structure, it must be located outside the building.

4. Can more than one automatic clothes washer discharge into a standpipe? Yes, there is nothing in Comm 82.33 to prohibit this practice.

Additional plumbing Q&A is at <http://commerce.wi.gov/SB/SB-PlumbingDatabaseReport.html>.

If you have further questions on these topics, contact a plumbing plan reviewer listed on page 11 of this *WCCR*.

Current S&B codes online:

<http://www.commerce.state.wi.us/SB/SB-DivCodesListing.html>

Commercial, historic buildings code changes January 1

Commercial buildings and historic buildings code changes were effective January 1.

The Comm 61-65, Commercial Building Code,

package is a group of miscellaneous changes that are a follow-up to the 2002 major Comm 61-65 changes.

The rule modifications in Comm 70, Historic Buildings, and the accompanying creation of rules under Comm 62, are to improve the consistency of construction requirements for historic buildings with the requirements of the Commercial Building Code, and to update technical requirements for historic buildings.

Pool code changes February 1

Changes to Comm 90, Design and Construction of Public Swimming Pools Code, are expected to be effective February 1, 2005.

The adopted rules revise a portion of the code in light of a national draft model standard for water parks, ANSI/NSPI-9, Standard for Aquatic Recreation Facilities.

The major proposed revisions to Comm 90 relate to the creation of two subchapters: Subchapter IV - Water Attractions, which includes water parks and other water attractions such as interactive play features, and Subchapter V - Slides, which is being created and expanded to address these common pool features.

For more information, contact S&B's Public Swimming Pool Program Manager, Ldocken@commerce.state.wi.us, 608-785-9330.

Fire Dues Program language revised

Revisions to Comm 14, Fire Prevention Code, dealing with administrative expenses and substantial compliance in the Fire Dues Program, were effective January 1, 2005.

Question may be directed to Joe Hertel, S&B Fire Prevention Program Director, jhertel@commerce.state.wi.us, 608-266-5649.

Public swimming pool plan submittal and inspection training in January and February

The Safety and Buildings Division is offering training in Waukesha and Wausau on the plan submittal and inspection requirements for public swimming pools in Wisconsin. **This training is free**, but pre-registration is required.

- What is needed on a complete plan submittal, including application forms, drawings, pipe schematics, labeling, fees, signatures, etc.

- An inspection checklist will be handed out to inform the designer, contractor, etc., exactly

what the inspector will be looking for on site.

- The recently revised administrative rules on water recreation attractions in effect in 2005 will be explained.

- Wspecial feature on which types of slides need plan review and inspection.

- There will be review of S&B's swimming pool Q&A Web site info.

- Attendees will receive a free copy of the current Comm 90, Design and Construction of Public Swimming Pools.

Checkmark which class you plan to attend:

___ Wausau - 1/13/05 (Plaza Hotel & Suites, 201 N. 17th Ave., 715-845-5773) 12:30 p.m. - 4:30 p.m.

___ Waukesha - 2/2/05 (Quality Inn, 2417 Bluemound Rd., 262-786-0469) 12:30 p.m. - 4:30 p.m.

Fill out information. Make a copy for yourself and send form back to S&B. Each student must complete a separate registration form. Pre-registration is required. Arrive 30 minutes early to check in. No confirmation letters will be sent. Seating is limited. Lists of people registered for the classes are on the S&B WebSite, <http://www.commerce.state.wi.us/SB/SB-DivContinuingEducation.html>.

Electrical Q&A

Answers based on the 2002 National Electrical Code. For info, contact the S&B Electrical Consultants listed on page 11.

1. How can the motor disconnect be installed in sight of a submersible well pump motor?

Answer: It may be impractical to install the required disconnect within sight of the motor. Section 430.102(B) of the NEC requires a disconnect to be located in sight from the motor location and the driven machinery location. The exception, (a), says that where such a location is impracticable or introduces additional or increased hazards to person or property, the disconnect at the motor shall not be required. Using the exception; the disconnect could be located in sight from the controller provided a permanently installed means for locking the disconnect in the open position is provided. **Comm 16.38 recognizes the exception without the proof of impracticability, or increased hazard.**

2. A church we are working on has lighting fixtures that were made in Italy. There does not appear to be a listing mark on the fixtures. Are lighting fixtures required to be listed?

Answer: No, the NEC does not require luminaires/lighting fixtures to be listed. Listing is an acceptable method indicating compliance with the

Commercial Buildings Delegated Municipalities

Some municipalities in Wisconsin have authority to do building or fire protection plan review, inspections, and otherwise carry out code-related functions as delegates of the Department of Commerce. For further information, and a list of current delegated municipalities, see the S&B WebSite: <http://www.commerce.state.wi.us/SB/SB-CommercialBuildingsDelegatedMunicipalities.html>.

construction requirements for luminaires found in Part VII of Article 410.

3. Is it permissible to terminate two circuits on a single circuit breaker?

Answer: Yes, if the breaker terminal is identified for connection of two conductors. Section 110.14(A) states that "Terminals for more than one conductor and terminals used to connect aluminum shall be so identified."

4. If a motor control center is used as service equipment, is it required to be marked as "Suitable for Use as Service Equipment?"

Answer: Part VIII of Article 430 covers motor control centers. Section 430.95 states that "Where used as service equipment, each motor control center shall be provided with a single main disconnecting means to disconnect all ungrounded conductors." The UL General Information Directory, page 68, 2004 edition, adds that "The marking 'Suitable for use as Service Equipment' appears on each Motor Control Center section optionally intended for use at a service. Some sections incorporate neutrals factory-bonded to the enclosure. Such sections are marked 'Suitable only for use as Service Equipment.' A section marked for use as services may also be used to provide the main control and means of cutoff for a separately derived system."
